EDUCATION

University of California, Santa Cruz

September 2025–May 2027

Computer Science, B.S.

GPA: 4.0

Relevant Coursework: Data Structures & Algorithms, Machine Learning, C language

City College of San Francisco

August 2023–May 2025

Computer Science, A.S.

GPA: 3.7

Relevant Coursework: Computer Architecture in Assembly, Linear Algebra, Java, Discrete Math, Python

WORK EXPERIENCE

Pioneers in Engineering at UC Berkeley

Berkley, CA

Software Project Manager

Dec 2024 – July 2025

- Led a cross-functional team of 15 engineers and designers to develop a live tournament website for high-school robotics competitions.
- Defined product requirements and coordinated frontend (React) and backend (API integration) workflows, ensuring on-time delivery.
- Managed recruiting, onboarding, and task assignments, enhancing team velocity throughout a 7-month project timeline.

Mamble Labs

Yerevan, Armenia

Software Engineer Intern

Jul 2022 - Dec 2022

- Developed and launched 3 production web apps with React and Next.js, improving load speed by 25% and earning strong client feedback
- Enhanced UI consistency and streamlined team workflow using Tailwind CSS, Bootstrap, and Git, reducing support tickets by 30% and deployment time by 40%
- Overcame technical debt by refactoring legacy API modules to eliminate data-fetching bottlenecks and resolve persistent synchronization errors.

PROJECTS

Transfer Map - AI Student Advising Platform (CruzHacks)

Santa Cruz, CA

Founder & Project Lead

January 2026 – January 2026

- Led a 4-person team to architect an AI-driven platform streamlining the UC transfer process for community college students in impacted majors.
- Developed core logic to analyze Assist.org articulation data and university requirements, achieving 93% accuracy in identifying missing coursework during evaluation.
- Architected system integration for API-based data retrieval, designed to provide verified information for all transfer requirement matching.
- Delivered a functional prototype within a 24-hour hackathon window; recognized by judges for high technical ambition and problem-focused design.

Armenian Whisper Translator

San Francisco, CA

Personal Project

July 2025 – Present

- Architected a real-time Armenian-to-English translation pipeline using Python and OpenAI Whisper, reducing Word Error Rate (WER) by 15% through custom audio preprocessing and achieving an end-to-end latency of <1.5 seconds.
- Developed a full-stack Streamlit interface integrated with Pandas to benchmark model performance against 500+ verified test cases, ensuring high translation accuracy across both Eastern and Western Armenian dialects.
- Deployed an asynchronous processing queue to handle concurrent audio requests, improving system stability and throughput during high-load testing.

SKILLS

Software: **Python, JavaScript, TypeScript, SQL, HTML5/CSS3, RESTful APIs**

Basic Knowledge: **Java, Assembly, C, C++**

Frameworks & Libraries: **React JS, Next JS, Node JS, PyTorch, Pandas, Numpy, Tailwind**

Version Control & Team Tools: **Git, Gitlab, GitHub, Atlassian, Docker, Slack**
